

# The DAKOTA

50' x 32'  
Main Floor 1600 Sq. Ft.  
Basement 1614 Sq. Ft.

This floor plan is based on our home, after 20 years it's still right for us. This version has added a laundry/mud room and half bath just inside the back door and an optional log truss in the kitchen/dining area. The lower level walk out or daylight basement makes this plan appropriate as a vacation cabin or family home. Adding a covered deck across the back would make room for a hot tub.
